Allowable Subject Matter

4. Claims 1-20 are allowed.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest individually or in combination the following:

memory that may receive and store, at a first clock rate used in the first clock domain, the respective data and the receptive related control information, the memory also storing, in association with the respective data and the respective related control information, the respective identification information generated by the first logic section that may be used to identify the receptive types of information represented by the respective data and the respective related control information stored in the memory, the memory being configured to permit retrieval, at a second clock rate used in the second clock domain, of the respective data, the respective related control information, and the respective identification information stored in the memory..

For these reasons claims *1 and 11* are deemed to be allowable over the prior art of record, and claims *2-10 and 12-20* are allowable by dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
